

Dear Faculty, Parent and Staff

The University Laboratory High School (Uni High) at University of Illinois at Urbana-Champaign (U of I) continues with its goal to maintain a safe educational and working environment. As part of this, Uni High makes every effort to comply with the Asbestos Hazards Emergency Response Act (AHERA) rules, which were promulgated by the US Environmental Protection Agency (EPA). Per these rules Uni High periodically inspects its five associated school buildings and performs repairs as needed; maintains updated Asbestos Management Plans in the school office; and, annually notifies the parents, faculty and staff of the availability of these Management Plans.

The Asbestos Management Plans for Uni High and its associated building are available through the school business office and the Facilities and Services Division of Safety and Compliance. You may request to review these plans during regular business hours.

If there are any specific questions regarding the asbestos management in any of the Uni High school buildings, please contact Jeremy Neighbors, Associate Director of Safety and Compliance at the U of I Division of Safety and Compliance, (217) 265-9828.

Sincerely,

Michael C. Adams
University Laboratory High School
Assistant Director of Business Operations
Asbestos Designated Person
